

Orem City v. Cottonwood Heights Water Rates: Homes, Hospitals, Schools, and Industry

Orem \$.55 per 1,000 Gallons v. Cottonwood Heights \$1.52 to \$3.28 per 1,000 Gallons

Exhibit-5

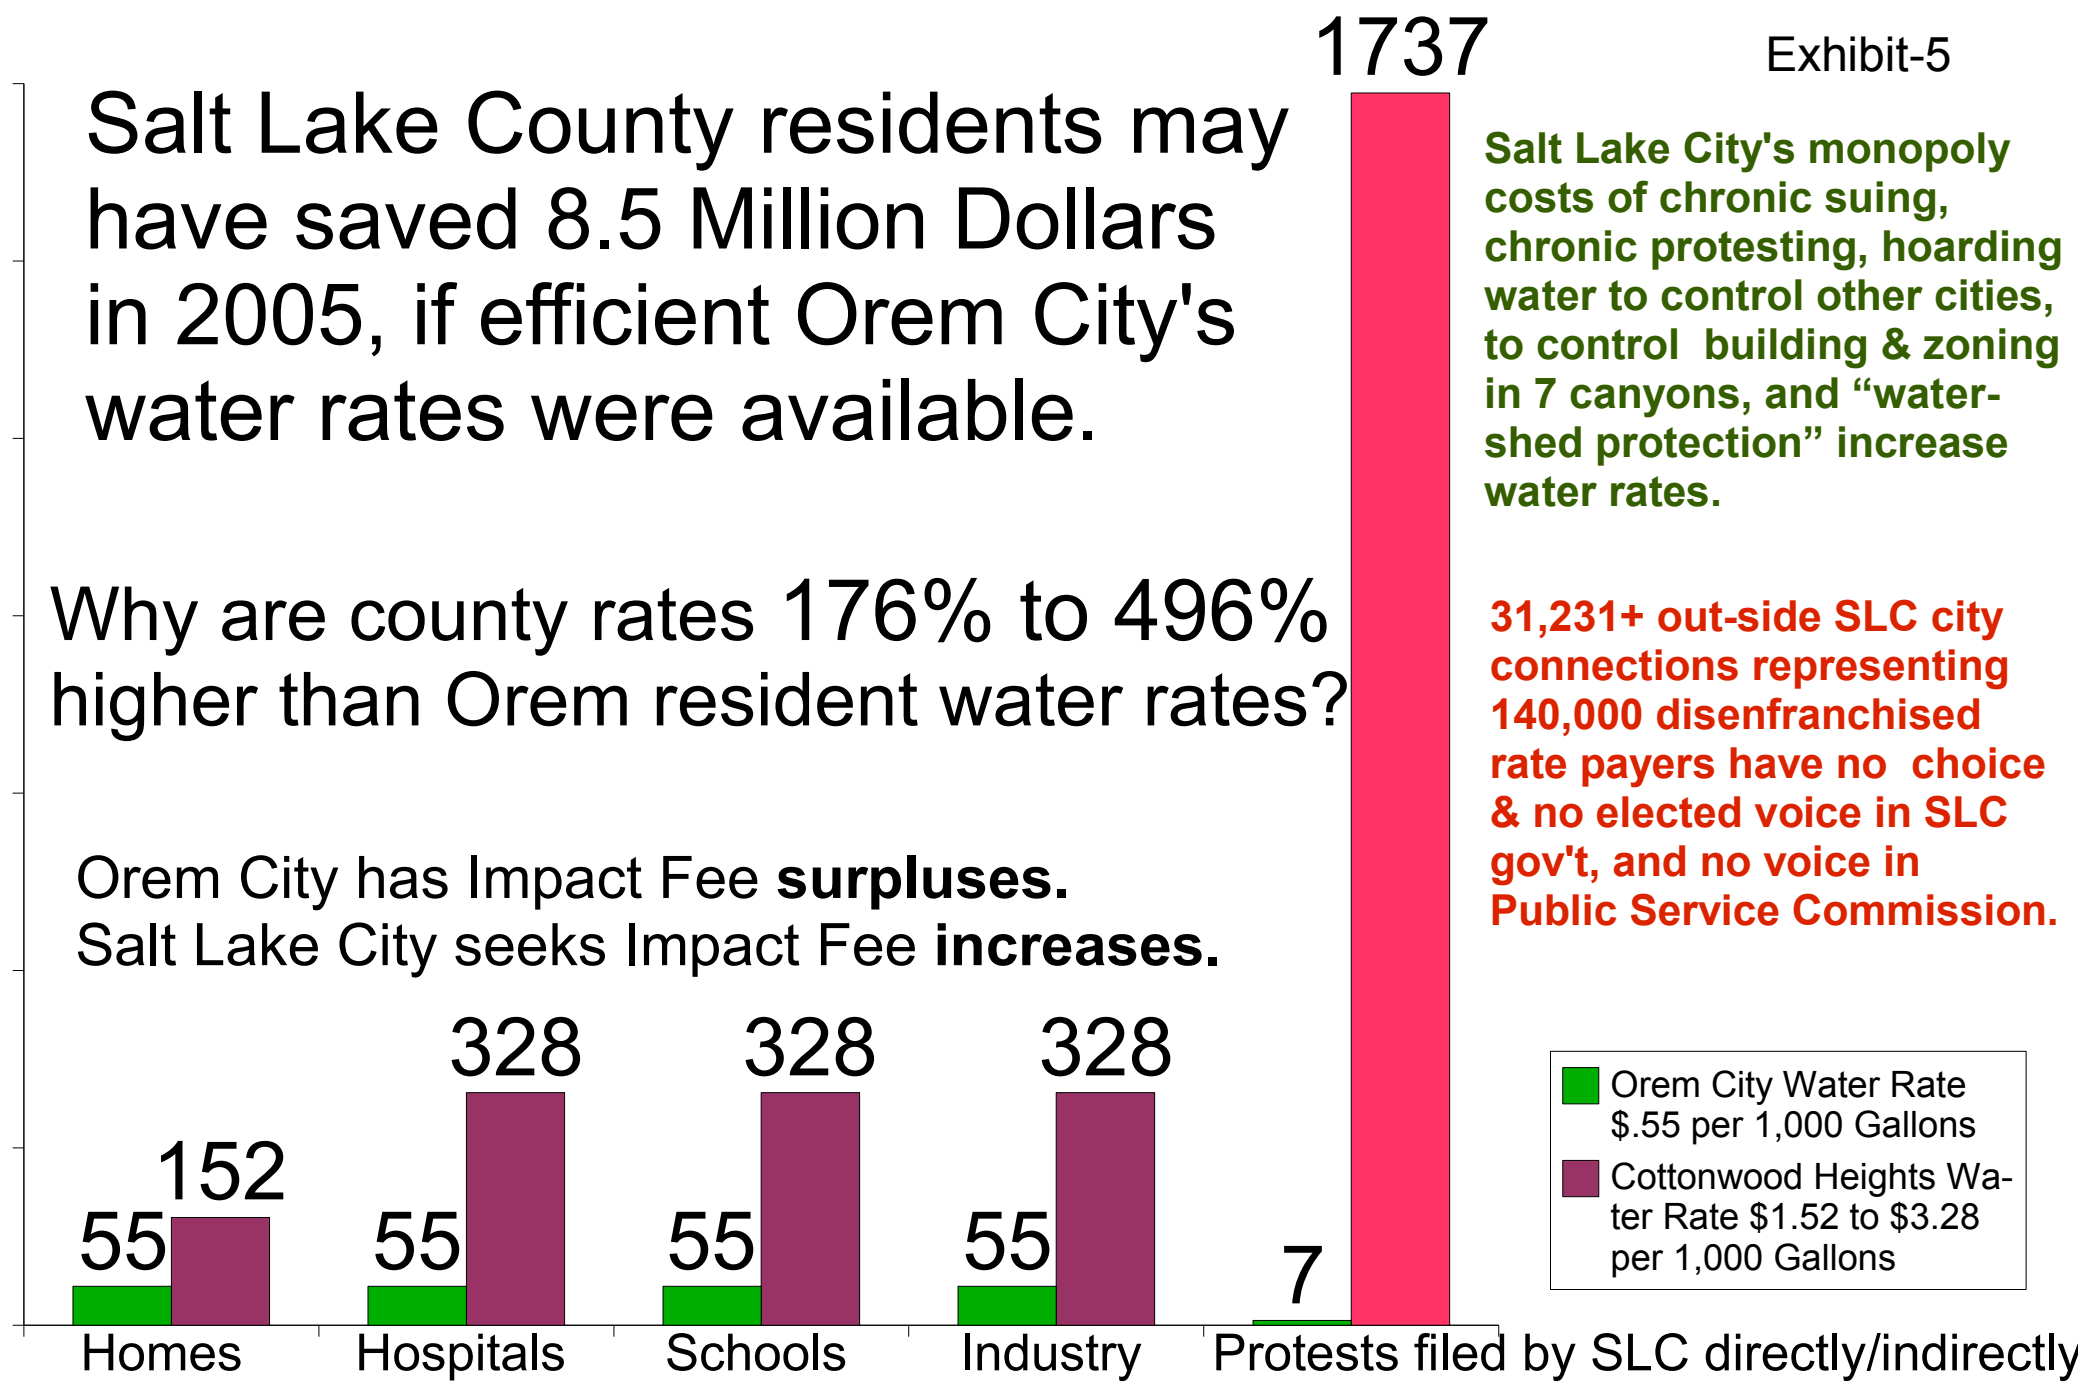

Salt Lake County residents may have saved 8.5 Million Dollars in 2005, if efficient Orem City's water rates were available.

Why are county rates 176% to 496% higher than Orem resident water rates?

Orem City has Impact Fee **surpluses**.
Salt Lake City seeks Impact Fee **increases**.

Salt Lake City's monopoly costs of chronic suing, chronic protesting, hoarding water to control other cities, to control building & zoning in 7 canyons, and "watershed protection" increase water rates.

31,231+ out-side SLC city connections representing 140,000 disenfranchised rate payers have no choice & no elected voice in SLC gov't, and no voice in Public Service Commission.

Legend:
■ Orem City Water Rate \$0.55 per 1,000 Gallons
■ Cottonwood Heights Water Rate \$1.52 to \$3.28 per 1,000 Gallons
