

**26 Salt Lake City deep wells reported to the Utah Division of Water Rights under Public Water Supplier Information—100,000 acre-feet of pumping capacity excluding unknown number of wells associated with well rights.**

**Data source: Public Water Supplier Information on the public records of the Utah Division of Water Rights February 13, 2008.**

2.275 cfs + 8.9 cfs + 10 cfs + 8.467 cfs + 5.682 cfs + 4.7 cfs + .98 cfs + 3.409 cfs + 5.566 cfs + 8.015 cfs + 9 cfs + 5.57 cfs + 6.2 cfs + 1.192 cfs + 9.238 cfs + .557 cfs + .312 cfs = 90.063 cfs for 17 wells. 17 well average is 5.3 cfs. Extrapolate to 26 wells = 137.8 cfs or 99,738.95 acre-feet of pumping capacity.

\*THE water is pumped from the well by a deep well turbine pump and by means of a booster pump is forced under pressure into Salt Lake City's 20" supply main on 27th South street, where it is commingled at times with water from other sources and is used for domestic and municipal purposes. Measurements of the flow from this well taken from Republic Flow Meter charts on file in Waterworks Department. Date: Aug 24, 1934, 10.0 sec. ft. Aug 29, 1934, 10.04 sec. ft. - July 13, 1937, 10.0 sec. ft. REPAIR JUNE 27, 2000 Comments: Brush & Bail Well
