

## 2006 well data from Utah Division of Water Rights Public Supply Information Report-- Salt Lake City approximately 6% of annual use supplied from pumping wells.

| Well#      | Acre-feet of water pumped in 2006 |
|------------|-----------------------------------|
| Well #5    | 0                                 |
| Well #4    | 0                                 |
| Well #1660 | 247.8                             |
| Well #1659 | 213.6                             |
| Well #1658 | 0                                 |
| Well #1657 | 682.6                             |
| Well#1655  | .2                                |
| Well#1654  | 0                                 |
| Well#1653  | 111.5                             |
| Well#1652  | 136.6                             |
| Well#1651A | .1                                |
| Well#1650  | .4                                |
| Well#142A  | 0                                 |
| Well#14    | 0                                 |
| Well#11A   | 0                                 |
| Well#1078  | 0                                 |
| Well#1065A | 543.3                             |
| Well#1063A | 0                                 |
| Well#1062  | 682.6                             |
| Well#1061A | 3.3                               |
| Well#1056A | 0                                 |
| Well#1052  | 179                               |
| Well#1     | 0                                 |
| Well#1661  | 353.9                             |
| Well#fglen | 5.9                               |
| Well#campk | 2.1                               |
| WellField  | 1,758.6                           |

There are 27 entries which total 4,921.5 acre-feet. It is unclear if there is overlap under the WellField source and whether Well#1062's 682.6 and Well #1658's 682.6 are overlaps or one or the other are in error as the numbers are identical.

76,645 acre-feet reported as total delivered.  $4,921.5/76,645 = 6.4\%$
