

It is historical for a large public utility to denounce and attack an individual for challenging wobbly department numbers while at the same time hiding the water right hoard, and profit. Does SLC honestly operate 24,788 County connections for no profit? Isn't City and County "profit" absorbed by waste, inefficiency, and pet projects?

SLC Water Utility will do:

- 1-Make false and misleading statements about a person who challenges wobbly numbers using such words as "exaggerated," "fabrications" "misleading," "out of the realm of reality" "unfounded," "self-serving," "relentless assault," and the usual jargon of misbranding to divert attention away from the issues of hoarding, profit, waste, inefficiency, and water monopoly.
- 2-Sue you as an individual in a corporate declaratory judgement action.
- 3-Seek to foment a lawsuit against you using shareholders in a company you operate.
- 4-Have outsourced lawyers write smear letters to officials then retract them but not cc retraction letters to all parties.
- 5-Block you water business efforts in water companies where employees sit as directors, or advisory members sit as company official, or pay opposing council legal fees in active litigation against the shareholder, condone personal public attacks by a outsourced SLC lawyer saying Mr. Garside is a "bad" and "evil man."
- 6-Write numerous esoteric, photo filled articles about water, but not provide transparent, useful data to the public.
- 7-Use the water utility to have the public fund bureaucratic environmentalism. This "no profit" operation has managed to purchase 24,000 acres outside Salt lake City corporate limits.

GIS Revolutionizes Utility Efficiencies

It's time for climate change at the water utility.

Global Warming and Climate Change: Is the Quantity of Utah's Water Resources at Risk?

SLC Water Utility will not do:

- 1-Produce a water inventory to refute the claim of hoarding.
- 2-Divulge the profit it makes on 24,788 County "surplus" connections, on million of "surplus" Ontario Drain water sales in Wasatch County, etc..
- 3-Compare itself against Utah's 20 largest cities in a transparent manner.
- 4-Provide the real numbers of population water demand and supply.
