**Subject:** Re: 100,000 Utahns with no oversight on water rates

Thank you for your email. This is a real issue of concern. Our attorney indicates that a change in the state statute would be required for the PSC to regulate in these situations.

>>>

2nd paragraph from the bottom.

With 31,231 outside city water connections and 3 per per connection there are 90,000 folks with no choice or elected voice in SLC govt, or on the PSC on their water rates.

How much profit is made on un-needed "surplus" water sold to folks outside city limits?

Where is there oversight protection.

About 5% of Utah got looped holed out.

Utahwater.net address water monopoly issues. disenfranchised rates payers is one facet of the problem.
